

"BARIQA-ANWAR"

Friday slot (9am - 12pm)

**Hackathon-3: Day 6 " Deploy on Vercel
& Push o GitHub"**

**Website: "Shop.co" (E- Commerce
Marketplace)**

GitHub Uploading Procedure:

- I Placed all the secret keys in env.local.
- Then I moved the env file in gitignore file so that it wont get pushed on GitHub.
- Doing so my secrets will remain secrets.

GitHub Link:

<https://github.com/Bariqa-Anwar>

Best Practices Deployment:

- Chose Vercel to host my Marketplace.
- Followed best practices before deploying.
- Run "npm run build" command so that the deployment procedure will be secured from errors.
- Placed all of my data (like environment variables and secret keys) from env.local on vercel before deployment.
- After deployment allowed Cors.
- Visitors can see sanity dashboard through it.
